Friends:—

IN placing this Catalogue before you we take it for granted that you are much more interested in the quality of seeds you are to plant than you are in fancy high priced Catalogues. While we might expend thousands of dollars more in elaborate Catalogues, we do not consider this the better plan, for by saving this extra expense and being so situated in our own buildings on our seed farms our expenses are comparatively light and we can furnish you with the best quality of seeds at very reasonable prices.

We are one of the oldest firms in the seed business, dating back to 1845, and our reputation is of the best. While we aim to please our customers, and we have abundance of proof that we have done so in the past, we appreciate the fact that parties who have never used our seeds might feel a little shy about placing their entire order with us, so we ask such parties to send us at least a portion of their order and give our seeds a trial. Thousands of Market Gardeners and Farmers are taking advantage of our low prices and sending us their orders year after year. Let us place your name on our list of patrons, we don't think you will regret it. **We allow discount or premiums as an inducement, see page 19.**

Send us the address of your friends that you think would like to receive our Catalogue and we will gladly send them one.

Thanking our many friends and patrons for past favors and trusting that we shall continue to receive your orders, we are,

Respectfully yours,

THOS. GRISWOLD & CO.,

TERMS.

We do principally a cash with order business and cannot allow credit to unknown parties without satisfactory references. Parties that are reliable and well known to us we are willing to accommodate by allowing limited credit. Outstanding bills are due June 1st, 1906. **Premiums or a discount of 10 per cent. allowed for cash orders only.**

How to send money.—Remit by Post Office or Express Money Order, Registered Mail or Bank Draft. Postage Stamps may be sent for small amounts. Personal Checks accepted from parties having established credit.

Post Office Money Orders can be made payable at Wethersfield or South Wethersfield.

When Seeds are Wanted by Mail, postage must be added at the rate of 8 cents per pound for Seeds, 10 cents per quart for Corn and Onion Sets, and 15 cents per quart for Beans and Peas.

Bags, barrels, etc., free of charge. No charge for cartage. Purchasers pay their own freight unless otherwise agreed.

Shipping Instructions should accompany each order. If no such instructions are received we will ship by the best and cheapest route known to us.

After shipping in good order our responsibility ceases, claims for damages or miscarriage must be laid on the carriers.

Parties purchasing from us, and wishing references as to our business integrity are respectfully referred to R. G. Dun & Co's, and Bradstreet's Mercantile Agencies, also to our Postmaster, or Town Officers.

In common with other reliable seed houses, we sell our goods subject to the following disclaimer adopted by the American Seed Trade Association.

Disclaimer.—We give no warranty, express or implied as to description, quality, productiveness or any other matter of any seeds, bulbs or plants we send out and will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms they are at once to be returned.

Thoroughbred Leaming Corn.

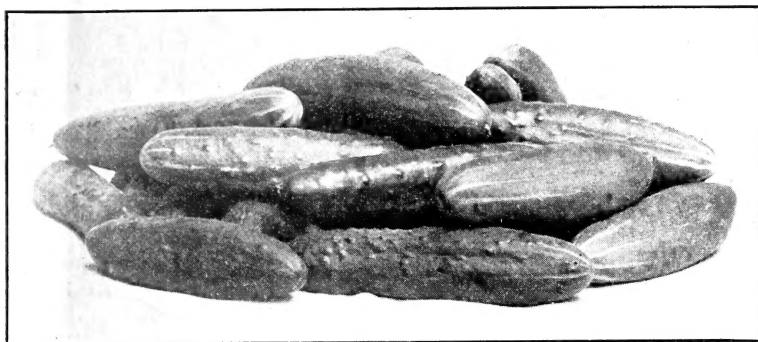

For many years the Leaming Corn has been one of the leading varieties of Field Corn for Ensilage and Fodder purposes as well as for Shelled Corn. This year we have been very fortunate in securing a much improved type of this excellent variety from a large grower that makes a specialty of growing seed corn and grows an immense quantity of this improved strain. This corn is bred up to its highest efficiency, ripening about the same time as the old style, kernels and ears more uniform, better filled out and of much purer type. It has a good sized stalk with abundance of leaves and is a heavy yielder of large, handsome ears making it a valuable variety for general purposes.

THE DAVIS PERFECT CUCUMBER.

A Sure Money Maker

For those engaged in Growing Cucumbers under Glass "for Profit" as well as for Truck Gardeners to Grow Out-of-Doors.

UNEQUALED FOR
QUALITY, SHAPE, COLOR
AND PRODUCTIVENESS.

What Mr. Davis Has to Say About His New Cucumber.

For several years I have been experimenting and trying to get a better strain of cucumber for forcing under glass as well as a good cucumber for growing out of doors, and after repeated failures I have at last succeeded in fixing a perfect type, combining quality, shape, color and productiveness. Am very sorry we did not get a picture of the crop. Everyone who saw the crop this year say they never saw anything to equal it. In color, a dark, glossy green; shape, slim and symmetrical, with an average length of ten to twelve inches. They never grow pussy and hold their color until nearly ripe when they turn white without a sign of a yellow streak on them. The quality is fine as the seeds are very soft when the cucumber is fit for table use, is very tender and brittle and of exceptionally good flavor.

Another strong point of merit is its splendid shipping qualities. It seems to hold its color and brittleness long after being cut.

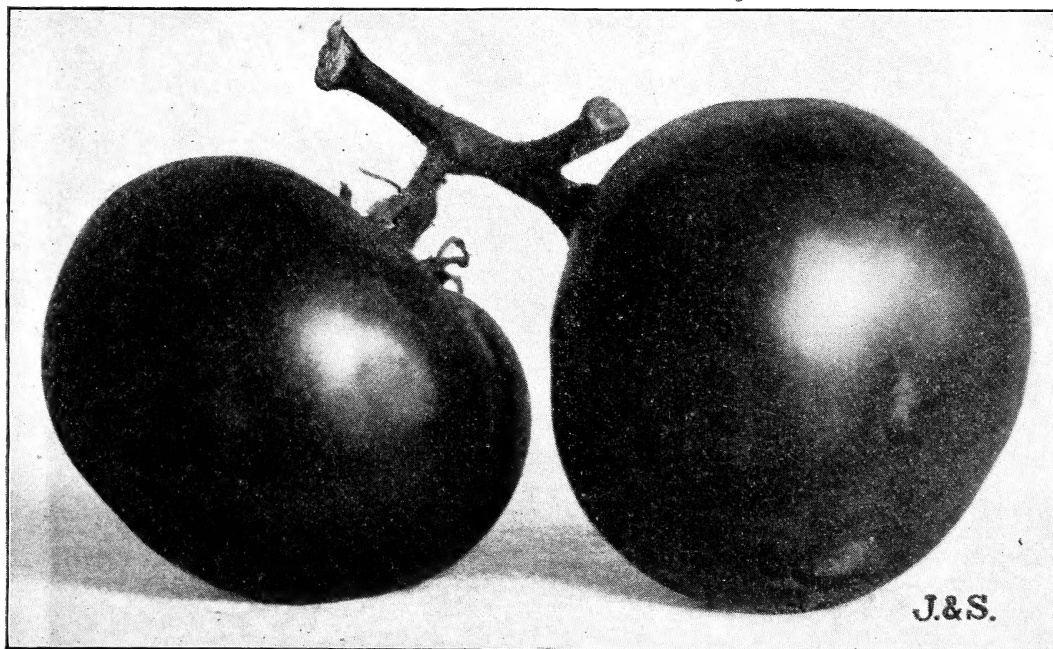

On account of its being such a strong grower it is able to resist the cucumber disease which works destruction among so many of the best Forcing varieties.

It is as early as the earliest strain of White Spine and it out-yields by far anything I have ever tried. This New Cucumber certainly has the fitting qualities to make it very popular when known.

EUGENE DAVIS.

PRICE: Per packet of 50 Seeds, 20 cts.; 3 packets, 50 cts.; 7 packets, \$1.00; 10 packets, \$1.30.

"June Pink Tomato" A Great Money Maker in a Distinct Class

The "June Pink Tomato" in habit of growth is similar to the Earliana. The plant is neat and compact, branching freely, with fruit hanging in clusters of six to ten fruits, both in the crown and at the forks of the branches. Under exactly the same conditions as given Sparks' Earliana and Chalk's Jewel, the "June Pink" yielded as much fruit as either, and the vines after the crop had been harvested were greener and brighter, and showed no tendency to blight. It ripens fully as early as the Sparks' Earliana and quite ten days to two weeks ahead of Chalk's Early Jewel.

The fruit is of medium size, uniform, smooth, and attractively shaped, without cracks or any green core. The fruit will average $2\frac{1}{4}$ to 3 inches in diameter, and from 2 to $2\frac{1}{2}$ inches in depth. The skin is reasonably tough so that it is excellent for shipping purposes.

In color, it is a bright, pleasing pink, and in markets where a pink tomato is desired will bring 25 per cent. more in price than any red variety. It has the further quality, making it especially desirable for private use, of continuing to bear and ripen fruit up until the frost.

In offering the "June Pink Tomato," we do so with every confidence that it will at once take the unique position in pink varieties which the Earliana now holds over the whole country in the red sorts.

PRICE: Per pkt. of 40 Seeds, 20 cts.; 3 pkts., 50 cts.; 7 pkts., \$1.00; 10 pkts., \$1.30.

SEED POTATOES.

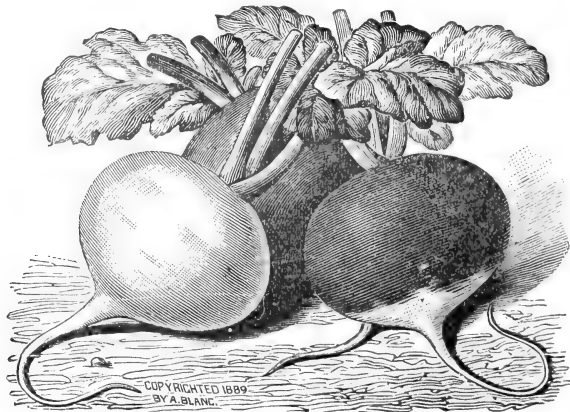

The Potatoes grown in Aroostook County, Maine, are shipped throughout New England and portions of the south and west for both eating and seed purposes, and certainly there are no better potatoes grown than these for seed stock. Many of the best potato growers change their seed stocks every year for these potatoes to plant and think it pays them well to do so, getting much better results, and the demand is greatly increasing. We have thousands of bushels of these potatoes grown for us for seed in the extreme northern part of Aroostook County, where they are now stored in frost-proof cellars to be shipped to us in the spring as soon as the weather will permit, probably reaching us about April 10th, and we reship the bulk of them to our customers direct from the cars thus saving cartage and storage and are in a position to sell them at very reasonable prices.

Prices subject to market fluctuations.

GRASS SEED.

DON'T BUY INFERIOR GRASS SEED. If you do you will have your land full of obnoxious weeds before you know it and wonder where they come from. There is a great difference in quality of grass seed on the market and you can buy most any grade you want, but the best is the cheapest in the end. We handle a choice grade and shall be pleased to mail samples if wanted. Grass Seed is very liable to fluctuate in price and it is impossible to give permanent quotations. Below are prices ruling at the time this Catalogue was printed and we will stand by them as long as we can. We are always glad to quote by letter.
